

## Curly Leaf Pondweed Treatment Services 2020

### **I: Aquatic Plant Management Service**

Based on the previous information supplied by the Association in 2019, and spring 2020 field inspections, we have determined the following treatment for Lake Summerset for curly leaf pondweed.

This application will use aquatic herbicides that are EPA registered and will be applied in accordance with the manufacturer label for application rates. All applications will be applied by licensed applicators. This program does not include removal of plant material.

***37.79 acres to be treated.*** (See attached vegetation biovolume and treatment maps).

### **II: Pricing**

Aquathol K (Endothall) will be applied to curly leaf pondweed with subsurface injecting trailing hoses.

### **III: Deliverables**

- JadEco, LLC will provide the materials, labor, insurance, technical guidance, and equipment to perform the aquatic plant management services outlined above.
- All treatments require written approval from an authorized representative for Lake Summerset Association. Once approved, the treatment will be scheduled within two (2) weeks.
- JadEco, LLC will provide a digital file of water-use restriction signs for Lake Summerset Association staff to post and remove on shoreline treatment zones.

### **IV: Provided by client**

- Prior to treatment, Lake Summerset Association must provide JadEco, LLC with written approval of the surface acres to be treated.
- Posting and removal of water-use restriction signs are the responsibility of Lake Summerset Association staff.
- Member notification for the treatment and water-use restrictions is the responsibility of Lake Summerset Association.
- Client will communicate with Lake Summerset Association Staff and private owners on any water use restrictions if lake water is allowed to be used for irrigation.
